The **Teachers Support Network** is all about high aspirations. Somewhere between the Federal No Child Left Behind mandate for "highly qualified" teachers and the local reality, stands the unrelenting wall of the status quo. The Teachers Support Network is the road map for states and school districts to get around it, through it or over it - it's the process, the techniques and the system for recruiting and retaining the highest quality teacher for every classroom.

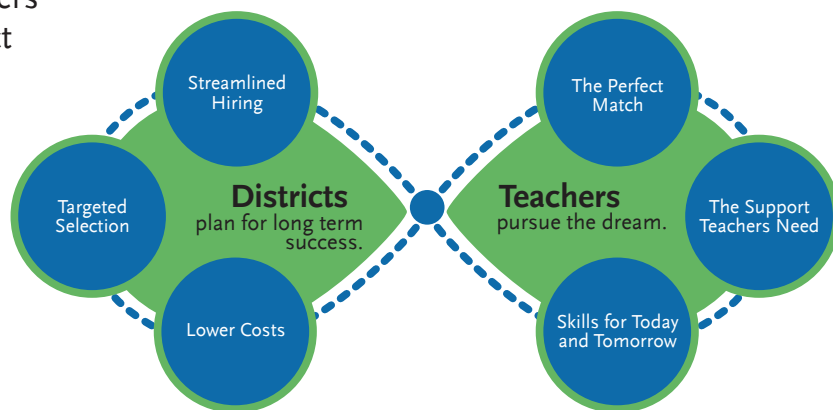

The **right tools** for the job!

The best practices, most innovative technology and a full spectrum of unmatched tools and personal services for recruiting and retaining highly qualified teachers.

Teachers **pursue the dream.**

The quest for knowledge is the foundation of education. It's also at the core of Teachers Support Network's services and solutions.

Teachers seek employment by building a portfolio that includes credentials, work history and special interests or needs. This portfolio is made available to the districts with positions that match teachers' criteria. Teachers also use Teachers Support Network to contact other teachers, share experiences and gather information related to their careers. Resources for professional development and mentoring are also available, making it possible for teachers to get the information they need when they need it — to further their careers and reach their goals.

Imagine the possibilities! Sign up today!

When districts and teachers get the support they need, students get the education they deserve. Everyone succeeds. Everyone wins. It's this support, which begins with Teachers Support Network, that makes possibilities endless, potential boundless, and the future...exciting!
